When Alside introduced Charter Oak, it was an industry first: an advanced nail hem and locking system that provided added rigidity and reliability to the entire panel. Today the TriBeam® System remains the industry standard for exceptional rigidity and performance.

That rigidity means unsurpassed installation quality: straight course lines; smooth, even walls; top-to-bottom beauty, in both new construction and remodeling projects. And you can count on that quality for as long as you own your home. Alside’s lifetime limited warranty* puts it in writing.

You can also count on superior resistance to the shearing power of forceful winds. In independent tests, the TriBeam rolled-over nail hem held Charter Oak solidly in place in winds reaching Category 5 hurricane intensity. We hope you never need that kind of reliability, but it’s comforting to know it’s there. Charter Oak XXL. Engineered for lasting beauty.

*See printed warranty for complete details.
Beautiful and dependable – Charter Oak XXL reinforced vinyl siding is more than twice as long as standard siding, 25' to be exact. At the very least, that means significantly fewer overlaps and a faster, easier installation. More importantly, Charter Oak XXL siding gives installers all the flexibility they need to create the long, clean course lines that give a home the distinction of quality.

**AN ECO-FRIENDLY CHOICE**

The home that protects you can also help protect the environment. As a durable, eco-friendly product with a long service life, Alside vinyl siding reduces the depletion of wood and other natural resources used in home construction. And because it never needs to be repainted, it helps prevent paint, stain and other maintenance-related products from harming the earth.

**CLASSIC PROFILES.** The traditional clad-board profile (4-1/2” exposure width) is an American favorite, appropriate for every type of home and every region of the country. For a panel with an added dimension of rural, choose the elegant Dutch lap profile (4-1/2” exposure width) with its graceful cove detailing.

**NATURAL SURFACE TEXTURE.** Charter Oak XXL looks like it came from a lumber mill, not a manufacturing plant. It features a detailed texture that looks and feels like the surface of quarter-sawn oak boards.

**THE LOOK OF FRESH PAINT.** Whatever color and profile you choose, Charter Oak XXL provides a luxurious low-gloss finish that resembles natural wood beauty.

**DEEP, REALISTIC SHADOW LINES.** Shadow lines define panel courses by providing a sense of depth. The thicker the bottom edge of a panel, the more pronounced the shadow. And the deeper and bolder the shadow, the richer and more elegant the impression created. Charter Oak XXL features a full 3/4” panel projection, the same as costly wood siding.

**A PALLETTE OF CONTEMPORARY COLORS.** Bright colors go clear through the panel, so there’s no need to worry about chipping or scratching. And thanks to its rich, deep colors, the possibilities are endless using ChromaTrue® technology. You get superior fade resistance. To keep your siding looking as fresh and clean as the day it was installed, just rinse occasionally with a garden hose to remove most airborne dust and dirt.

**COLOR-COORDINATED CHOICES**

When you paint the exterior of your home, your design options don’t go much beyond the basics: What color for walls, what color for trim? But with Charter Oak XXL, color choices are just the beginning. With its luxurious appearance and easy upkeep, it also strengthens to the environment more than many other siding products.

**STANDARD COLOR COLLECTION**

- **Glacier White**
- **Adobe Cream**
- **Cape Cod Gray**
- **Tuscan Clay**
- **Antique Parchment**
- **Monterey Sand**
- **Coastal Sage**

- **Midnight Blue**
- **Laguna Blue**
- **Charcoal Smoke**
- **Deep Moss**
- **Cast Iron**
- **Canyon Drift**
- **Laguna Blue**
- **Deep Blue**
- **Harbor Blue**

**CHARTER OAK XXL - BRINGS OUT THE CHARACTER OF YOUR HOME**

Beautiful and dependable – Charter Oak XXL reinforced vinyl siding is more than twice as long as standard siding, 25’ to the nearest 6”. At the very least, that means significantly fewer overlaps and a faster, easier installation. More importantly, Charter Oak XXL siding gives installers all the flexibility they need to create the long, clean course lines that give the home the distinction of quality.

**LONGER PANELS CAN HIDE IMPERFECTIONS IN EXISTING WALLS**

It’s easy to spot a home with an elegant siding installation. The course lines are straight and smooth. The joint lines – where individual “boards” come together – are either non-existent or carefully minimized for a virtually seamless look. The overall appearance is one of uniformity, uninterrupted beauty.

Yet, you typically see our seamless siding installation. Because border courses from nuts to different heights, installers can minimize joints to keep focus on the aesthetic features of a home. But that’s harder to do with standard length siding – whether vinyl, fiber cement or hardboard. Typically, they require a joint every 12 feet. With fewer seams, Charter Oak XXL also helps cut gaps – minimizing air infiltration slipping through the unappealing seams.
