

# New Construction Sliding Patio Door

**Model 1100** Fusion-Welded Sliding Patio Door

# Style that Brings the Outdoors Inside

The New Construction Sliding Patio Door offers a great solution for not only contemporary or traditional architecture, but also for residential, multi-family or light commercial installations. The sleek lines of this patio door, surrounded by an appealing beveled mainframe, make this a wise choice for beauty, maintenance-freedom and energy efficiency.

Contemporary handle for aesthetic appeal.

## Features and Benefits

- Fusion-welded sash and mainframe with integral nail flange add strength and rigidity.
- Steel-reinforced vertical sash members enable better performance.
- Low-friction, adjustable tandem rollers ensure ease of operation.
- Extruded aluminum roller track helps prevent corrosion.
- Screen with four-point roller adjustment provides ventilation while keeping insects out.
- Unit is fully field-reversible.
- Available in 5', 6' and 8' 2-panel and 9' 3-panel configurations.
- Integral transom available for all models in 10", 12" or 14" heights.

## Plus these Additional Features:

- Double barrier-fin weatherstripping at sash sides helps keep out dirt and noise, and protects against air infiltration.
- ClimaTech® insulated glass package features Low-E glass, argon gas and the Warm-Edge Spacer System for enhanced insulating performance.
- Jamb extensions reduce interior trim and provide ease of installation.

## Color Collection

Create custom appeal with our broad color collection.
