SIZE GUIDE

TABLE OF CONTENTS

- 3 Specifications
- 4 Quick Spec Guide
- 5 Single-Hung – Model 1700
- 14 Twin Single-Hung – Model 1720
- 22 Triple Single-Hung – Model 1730
- 28 Picture Window – Model 1704
- 41 Single-Sliding Window – Model 1702
- 47 3-Lite Sliding (Q/H/Q) – Model 1703
- 50 3-Lite Sliding (Equal-Lite) – Model 1709

Materials

The rigid, extruded vinyl profiles comply with the performance standards of AAMA 303-97. The color extends through the profile extrusion of White, Beige and Classic Clay. In addition to the three standard vinyl colors, seven exterior painted options are also available. This product is not available in the Western United States.

Frame and Sash

All frame and sashes are assembled using mitered and fusion-welding technology for added strength and durability. The frame jamb depth is 2-7/8". The frame incorporates an integral pre-punched nailing fin with sloped sill to promote water runoff. Weep holes are included on the frame to ensure standing water is directed to the exterior plane of the unit. An interior and exterior accessory groove is standard to accommodate various frame accessory and assembly options on the product. The sash system has an extruded lift rail and a full interlock with reinforced locking rail for added strength and security. The multi-chambered profile design with double-barrier, heavy-duty fin seal weatherstripping provides improved energy efficiency and increased noise reduction.

Glazing

The 3/4" insulated glass unit consists of two panes of glass sealed around a warm-edge spacer system. The glass is mounted into the sash using a closed-cell foam tape with acrylic adhesive. The insulating glass units comply with the performance requirements of the IGCC.

Glazing Options

3/4" insulated glass is available in clear, Low-E and Low-E with argon, tinted, obscure and laminated insulated glass packages. Many glass options are available in tempered glazing.

Weatherstripping

A heavy-duty, double-barrier fin seal weatherstrip is applied along dual full perimeters of the operating sash to help block air, water and dust infiltration. A high-performance foam filled weatherstrip is used on the bottom rail to provide maximum performance and protection against water infiltration.

Hardware

Single-action, color-coordinated cam style locks with slotted keeper come on all operable windows. A block and tackle balance system is utilized to support the vertical operable sashes and provide easy operation when raising and lowering sashes. Low profile tilt latches and pivot pins are equipped for utilization of the "tilt" function. Vent latches come standard on single-hung windows. An ADA compliant lock option and Window Opening Control Device (WOCD) is also available.

Insect Screens

The optional, overlay, full view fiberglass insect screen is set in aluminum frame to match the color of the unit. Insect screens are intended to allow air and light in and keep insects out. They are not intended to keep anyone or anything from falling through an open door or window.

Grids

Internal grids are available in 5/8" flat, 3/4" contoured or 1" contoured styles. The internal grids are available to be color-matched to the vinyl extrusion or exterior paint colors.

Extension Jambs

Extension jambs are available for the 1700 Series products. Primed wood jamb extensions are available in support of four construction wall depths: 4 9/16", 6 9/16", 7 1/16" and 7 9/16".

Additional Accessories

Please contact your sales representative or local building supply house for a complete listing of additional accessories.

Installation

Proper installation instructions for the 1700 Series vinyl products can be located at www.alsidewindows.net

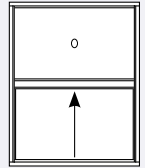

Performance

All 1700 Series products are rated and labeled in accordance with NFRC requirements. All 1700 Series products are tested and certified to AAMA requirements. Please refer to www.aamanet.org for details.
