

Increase Productivity and Profitability of Full-Frame Replacement Window Installation with Alside's Trimworks® with SwiftLock™ Technology

*New Decorative Window Accents Innovation Reduces Installation Time
Per Window by 20-40 minutes*

CUYAHOGA FALLS, OH – Innovative. Faster. Easier. Alside,® a leading manufacturer of vinyl windows, patio doors, and siding, announced today the launch of an industry-first trim solution for full-frame replacement projects. Trimworks® with SwiftLock™ Technology, designed for the Mezzo® Full-Frame Replacement System, offers beautiful aesthetics while saving time, labor and materials.

This revolutionary system provides the most reliable solution for installing and replacing vinyl windows with the following three components:

- Mezzo replacement window – high-performing, thin-line frame for maximum viewable glass and superior energy efficiency.
- Ideal frame type – nailing flange integral to the window frame provides for proper flashing and water management.
- Trimworks Decorative Window Accents – simple, quick and easy solution for trimming out the new window with flat casing or brickmould, reducing total installation time.

“Trimworks Decorative Accents were created with the window dealer in mind,” said Shawn Hardy, senior vice president and general manager of integrated products. “They’re fabricated at the same time the window is made for an exact color match and fit, no matter the size or configuration. The attachment method ensures a secure, perfect fit...every time.”

Flat Casing
Available with and without bullnose sill.

Brickmould
Available in 1.5" and 3/4" designs.

Improper replacement of vinyl windows can generate service calls, drive up costs and result in poor-quality work that must be redone. Alside's new solution can save up to 20-40 minutes of installation time per window—reducing waste materials and eliminating the need for special equipment, training or cutting skills to trim a window. More windows can be installed per day, which means profitability increases as well. Depending on the desired look, installation time can be reduced between three to seven hours for every 10 windows installed.

This system features a variety of distinct designs from traditional to contemporary to enhance a home's exterior:

- Brickmould (1.5" and 3/4" sizes)
- 3.5" Flat Casing (available 4-sided or with bullnose sill)
- Flushmount (for masonry openings)

In addition, Mezzo comes with a lifetime limited warranty and is available in an array of 13 color options, which feature a polyurethane coating technology with heat-reflective pigments for a strong and fade-resistant finish.
