A Beautiful Solution for Controlling Light

Integrated Mini Blinds

ON SLIDING PATIO DOORS

Integrated Mini Blinds on Select Sliding Patio Doors

Alpine Sliding Patio Doors offer the added convenience of an integrated mini blind sealed in the insulated glass unit. This enhanced design innovation keeps the blinds free from dust and damage, while allowing lift and tilt operation with easy fingertip control.*

ADVANCED DESIGN AND CONSTRUCTION

1. A single operator tilts and lifts the blind for convenient control of sunlight and privacy.
2. No-slip gear belt provides smooth lift and tilt operation.
3. Single cord-winding shaft ensures improved “stack,” which helps prevent the blind from coming in contact with the glass surface.
4. Self-leveling bottom rail allows the blind to be re-leveled if it becomes unbalanced.

PRECISION-BUILT FOR SUPERIOR PERFORMANCE

- Blinds remain virtually dust-free in the sealed insulated glass unit.
- Added safety – integral cordless blinds eliminate the risk of children or pets getting entangled in the cords.
- Rigorously tested at 15,000 cycles, far exceeding the industry standard of 3,500 cycles.
- Withstands use of doors opening and closing.
- Integrated mini blinds are backed by a **20-year limited warranty**^{††} for added peace of mind.

ENERGY-SAVING OPTIONS**

- ENERGY STAR®-certified glass packages available.
- **SolarThermD LT** – double-paned insulated glass unit with one pane of Low-E glass and stainless steel Intercept® Spacer.
- **SolarThermD LT SF** – double-paned insulated glass unit with two panes of Low-E glass (surface 2 and 4) and stainless steel Intercept Spacer.

Integrated mini blinds will feature a white blind.
