

# ALUMINUM GUTTER COIL AND RAINWARE SYSTEMS

*A Premier Choice for Durability, Style and Installation Ease*

**Alside**<sup>®</sup>

# The CURB APPEAL YOU DESIRE

## *Without Sacrificing Performance*

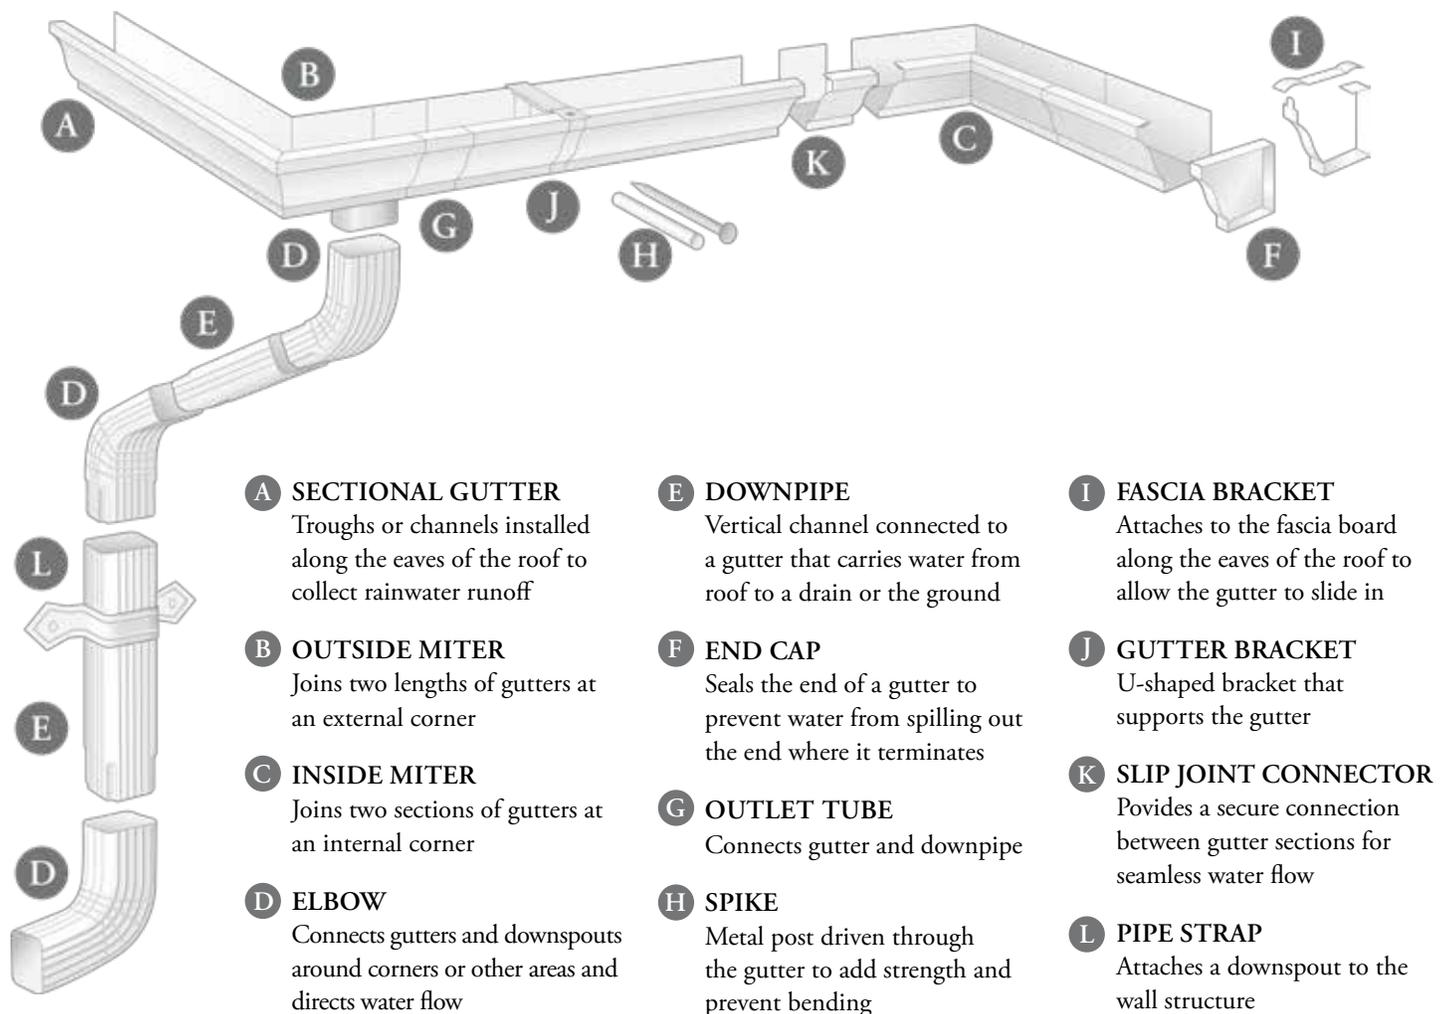

*With Alside gutter coil and rainware, you can be assured of a highly effective rainwater management system that's precision-fit to the architecture of your home. A full selection of beautiful colors with a premium finish further add custom elegance and curb appeal.*

### GUTTER COIL

Most professional contractors will fabricate gutters onsite to create a “seamless” system, resulting in a smoother appearance with fewer joints than sectional gutters. Quality-crafted for superior durability and formability, Alside aluminum gutter coil is corrosion-resistant and features a finished side with a resilient, baked linear polyester coating for greater dirt and stain resistance.

### RAINWARE

A well-designed rainware system is essential to protect your home from potential water damage. A combination of gutters, downspouts, elbows and other components, Alside rainware makes it easy to create a strong, weathertight system that collects water runoff from the roof and channels it away from the foundation, landscaping and other surroundings.

**A SECTIONAL GUTTER**

Troughs or channels installed along the eaves of the roof to collect rainwater runoff

**B OUTSIDE MITER**

Joins two lengths of gutters at an external corner

**C INSIDE MITER**

Joins two sections of gutters at an internal corner

**D ELBOW**

Connects gutters and downspouts around corners or other areas and directs water flow

**E DOWNPIPE**

Vertical channel connected to a gutter that carries water from roof to a drain or the ground

**F END CAP**

Seals the end of a gutter to prevent water from spilling out the end where it terminates

**G OUTLET TUBE**

Connects gutter and downpipe

**H SPIKE**

Metal post driven through the gutter to add strength and prevent bending

**I FASCIA BRACKET**

Attaches to the fascia board along the eaves of the roof to allow the gutter to slide in

**J GUTTER BRACKET**

U-shaped bracket that supports the gutter

**K SLIP JOINT CONNECTOR**

Provides a secure connection between gutter sections for seamless water flow

**L PIPE STRAP**

Attaches a downspout to the wall structure

## ALSIDE GUTTER COIL AND RAINWARE SYSTEMS COLOR SELECTION

Color availability may vary by location.

Note: Colors may be slightly different from their appearance in this brochure. Make final color selections using actual product samples.
