Alside

Pricing Update

June 15, 2026

Dear Valued Alside Customer:

Market conditions in the aluminum sector continue to trend upward, driven by sustained global demand and tightening supply conditions. Both the London Metal Exchange (LME) and Midwest Premium (MWP) indices have continued to increase, resulting in significantly higher replacement costs across the aluminum supply chain. These pressures are further compounded by rising freight costs related to ongoing fuel market disruption.

As a result, our suppliers have implemented price increases, and Alside is adjusting its pricing, as outlined below:

Vendor	Brand / Product	Increase Amount	Effective Date
Associated Materials Innovations	All Aluminum Products*	12%	7/13/2026

*Gutter coil is exempt from adjustment and will continue to be priced monthly

Key Details:

- Price adjustments will vary by product.
- For specific details, please contact your local Alside branch or sales representative.
- To maintain service levels, Alside reserves the right to limit order quantities.

At Alside, we remain committed to providing value through our broad range of products and services. We appreciate both your support and your business.

Sincerely,

Jackson Pettit
VP of Category Management, Alside
